The 11 basic values of the Light Awareness Philosophy

Light Love Life Order Harmony Rhythm Freedom Peace Truth Love Unity

We are the philosophical community in Light Awareness. We stand for the vision of transformation on earth for the essence-realization of Peace in the world. The basis, alignment and origin of our life and work together is the ideal philosophy of Light Awareness and its basic values, founded by the Peace visionary and healing philosopher David Wared.

From the theory of creation according to the Light Awareness Philosophy it is clearly, unambiguously, comprehensibly and completely substantiated what is the origin of all existence, of all creation and of all living beings. Only human recognition of this makes transformation on earth possible.

This means that originally the human beings are happy, whole and in abundance. Gratefully they live Freedom, Peace, Truth, Love and Unity by think-feel-acting.

Our vision is to accompany humanity back to its origin.

For this we live, love and serve - united, devoted and unconditionally.

Starting in Germany, we have already served in many countries on all continents.

With a large World Peace Journey, the "WORLD TOUR for PEACE by David Wared", together, we will travel to at least another 100 countries on this earth: Peace can come alive again in all those longing for Peace.

"CITIES of PEACE by David Wared" are emerging worldwide: a network of light-aware Peace communities spans our home planet earth. These are places where the philosophy of Light Awareness is taught and original Peace with all living beings is lived.

Our path of recognition as an intergenerational life community

Every member of our community has taken the steps to liberation, healing and recognition through their own lived experience, felt experience and recognition. We have recognized: Freedom, Peace, Truth, Love and Unity always begin within ourselves first. Thinking, feeling and acting are of equal value and are connected in think-feel-actions. In doing so, we are aligned with the 11 basic values of the Philosophy of Light Awareness. These are always for the good of all creation.

Each individual of our community changed and transformed when the energy, consciousness and information of these basic values were remembered, recognized and anchored within them again. The precondition for this were our own liberation from blockages and imprints, as well as healing and recognition. Clarification and healing of relationships with each other have been accomplished.

This is how we stand today as a community of the united for our task in the world. We live the originality of spirit-soul-life-unity: We share perpetual happiness, persistent being-happy and permanent bliss with plants, animals, people, Mother Earth and all existence.

Everyone is welcome, young or old, rich or poor, healthy or sick. Do you long to come home? We are THERE.

Our guidelines

Our guidelines are differentiated according to the 11 basic values and other essential aspects. The first two sentences describe how we think, feel and act, both on an individual and global level. In the third sentence, we express the philosophical very basis for each value in words.

We thank you for your opening out of spiritual touchedness, in the souls' being-touched for your personal, lively touch with essence-reality.

Heartfelt greetings, your Light Awareness Community

Wonders happen in every instant.
Please open your heart and your consciousness.
Let the miracle of healing happen everywhere and in everything.
